## **What is StarBoard Software?**

StarBoard Software is the software used to operate your StarBoard, the interactive whiteboard that improves the efficiency of communications in your business or school.

The information drawn on the whiteboard with an electronic pen can be saved and printed using StarBoard Software. Data from your computer can be displayed on the StarBoard along with your annotations.

It is also possible to operate your computer directly from the StarBoard using the electronic pen. StarBoard Software always reacts promptly to the movements of the pen.

From small meetings to events in huge halls, StarBoard Software provides you with the technology to realize effective digital communication.

## Screen elements

StarBoard Software contains the following basic screen elements. (The image below is an example in [Whiteboard mode](#).)

1. [Menubar](#) Displays menu commands for operating StarBoard Software.
2. [Scroll Bars](#) Used to scroll the editable area.
3. [Panel](#) Displayed when one of the four tabs on the sidebar is selected.
4. [Sidebar](#) Used to perform various operations from the tabs and panels on the sidebar.
5. [Editable Area](#) You can write, erase, and put clipart in the editable area.
6. [Page Tab](#) Used to turn to the previous/next page.
7. [Status Indicator](#) Displays an icon of the current active tool, current page number, and total number of pages.
8. [Rubbish Bin](#) Used to delete objects by dragging and dropping them onto the Rubbish Bin icon.
9. [Toolbar](#) Used to perform basic operations.
10. [Context bar](#) Allows you to make settings for the currently-active tool.

## Quick Start Guide

StarBoard Software provides the following preset settings for using the software.

When you start the software for the first time, the profile selection dialog box is displayed, and you can select the desired setting before using the software.

You can choose a pre-defined profile from the list.

### Startup

Check that the StarBoard is correctly connected. Then start StarBoard Software.  
(Complete [calibration](#) and select your [language](#) if necessary.)

A blank screen is displayed in Whiteboard mode (refer to [Selecting a mode](#) for details).  
You can perform some basic operations for StarBoard Software from the toolbar.

### Drawing

Select  (Normal-Pen) from the toolbar and start drawing.

### Erasing

Select  (Eraser) from the toolbar and trace the lines drawn previously.

### Changing the Pen colour/width

1. Select  (Normal-Pen) from the toolbar.
2. Select  (Tool Properties) from the toolbar.  
The **Tool Properties** widget is displayed.

3. Select the pen colour and width using the buttons or drop-down list.

## Saving

1. Select **Save** or **Save As...** from the **File** menu.  
The **Save As** dialog box is displayed.  
It is also possible to export the file to other file formats by selecting **Export** from the **File** menu.

2. Enter the file name, then select the location where the file should be saved.
3. Select **Save**.

## Exiting

Select **Exit** from the **File** menu to exit StarBoard Software.

If the current file has been changed, the confirmation dialog box is displayed to ask if the file should be saved. To save the file, select **Yes**, otherwise, select **No**. To cancel the operation, select **Cancel**.
